## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-5, 7-13, and 15-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re Claim 2, lines 17-20, recites in i) & ii). It is unclear what particular functions are applicable. "I" should be deleted because it makes the function optional. (Same reasoning for independent claim 7)

Re Claims 8-10, the claims should further define the method and not "The device claimed in claim 7". Left along is an hybrid claim.

Claims 11-13 are hybrid claim because it further defines "the communication device". Again, claims 11-13 should further define the method of claim 7.

Claims 15-17 are an hybrid claim because a single claim claims both an apparatus and the method steps of using the apparatus.

### ***Response to Arguments***

3. Applicant's arguments filed 12/20/05 have been fully considered but they are not persuasive.

Re Claims 2-5, 7-17 and new claim 18, applicant has deleted "where applicable" but have not deleted "I".

Art Unit: 2616

This is the reasoning, in the two process sequences, it unclear what process is in the sequence when “/” are between them because “/” makes the process optional. If the process does not require decryption then encryption is not necessary. Furthermore, if the encryption is required and decryption is not performed, then the claim is not enabling. The claims should recite position recitation of steps involve in the process sequence.

Applicant argues that claims 15-17 are not “hybrid” because it clearly recites “device” limitations. If the claim recites a device then it is an apparatus. However, the claim also recites in claim 15, line 14, “method also comprising the steps of”. Then, the claims are hybrids because it is unclear whether the claim is an apparatus or a method.
